

Why is ElseeMore still a beta release?

You may wonder why ElseeMore is still a beta?

A number of reasons:

Design changes are still active.

I can not offer full time support as you would expect for a commercial product.

I am working on my next version called EchoShack which will have 40 user call buttons. This can be found on my new website <http://echoshack.com> I am also working on some new visual attributes to help the visually impaired. Using the new Microsoft WPF (Windows Presentation Foundation) which allows the vector graphics to draw the buttons and components. This should allow me to make Buttons & Fonts to auto expand (magnify) when the mouse enters the button area.

Its free although I would appreciate a small donation towards the cost of the website and programming tools. I am retired these days so resources are limited. Thanks.

If you have any ideas for improvements then please let me know, via the contacts menu or email to webmaster -at- tonywakefield.com.au
